

—○— observed — Gaussian — Student- t tail fit Laplace

a HG residual / its $\sigma(x)$

$P(|z| > 3) = 1.27\%$, $4.7\times$ Gaussian

Student- t fit: $\nu = 7.1$

NLL $\downarrow$ 0.051 nat/dim (held-out)

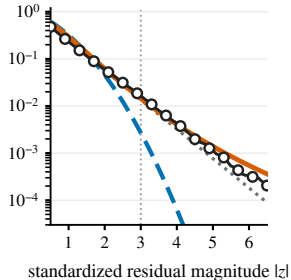

b MSE residual (fixed scale)

$P(|z| > 3) = 1.64\%$, $6.1\times$ Gaussian

Student- t fit: $\nu = 5.7$

NLL $\downarrow$ 0.082 nat/dim (held-out)

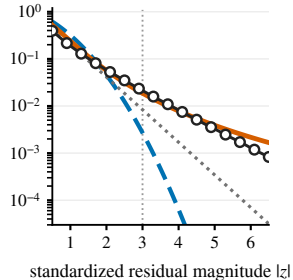

c Flow samples – mean (fixed scale)

$P(|z| > 3) = 2.12\%$, $7.9\times$ Gaussian

Student- t fit: $\nu = 3.3$

NLL $\downarrow$ 0.203 nat/dim (held-out)

d Flow samples – mean / own $\sigma(x)$

$P(|z| > 3) = 1.48\%$, $5.5\times$ Gaussian

Student- t fit: $\nu = 4.9$

NLL $\downarrow$ 0.081 nat/dim (held-out)
