

Table 1: **HT is effective across policy scales and benchmark families.** Success rate (%) of each task. The evaluation setting follows its benchmark’s evaluation protocol. In (c), each entry averages over all nine RoboMimic tasks. † denotes our reproduction of a published baseline; published results are left unmarked.

(a) GR00T N1.7 on RoboCasa and SIMPLER

Model	Benchmark / embodiment	Action-head initialization	Flow	MSE	HT (ours)
GR00T N1.7	RoboCasa / GR1	Pretrained	44.5	37.8	51.5
	RoboCasa / GR1	Random	14.0		33.5
	SIMPLER / WidowX	Pretrained	62.9 [†]		67.4
	SIMPLER / Google Robot	Pretrained	67.3 [†]		63.5

(b) Large robot models on LIBERO

Model	Evaluation	Flow	L1	MSE	HT (ours)
OpenVLA-OFT	Four-suite average		97.1		96.0
$\pi_{0.5}$	Four-suite average	96.9	—	96.8	97.6
Cosmos 3	LIBERO-10	95.2	—		96.0

(c) Small policies on RoboMimic

Backbone	State			Image		
	DP	MSE	HT (ours)	DP	MSE	HT (ours)
U-Net	89.9	83.1	95.1	97.8	73.8	95.1
Transformer	95.2	77.8	87.6	93.4	83.6	96.1
